Summary

Data, BI & Automation Engineer with 2+ years of experience building Python automation, scalable data pipelines, and AI-powered applications in fintech and microfinance. Delivered production systems supporting 406+ branches and 4,000+ users, automated workflows processing 730K+ records, and integrated Gemini-powered conversational analytics. Skilled in Python, Django, PostgreSQL, REST APIs, and LLM integration, with a focus on transforming complex business processes into intelligent, reliable, and efficient solutions.

Experience

Data, BI & Automation Engineer — Analytics & Digital Transformation Team

Aug 2025 – Present

Padakhep Manabik Unnayan Kendra | Microfinance NGO, Dhaka

- Engineered and deployed a production-grade Overdue Tracking Platform using Django REST Framework, PostgreSQL, Celery, and Redis, with secure authentication and REST API integration—replacing manual Excel workflows across 406 branches and supporting 4,000+ users.
- Shipped an AI-powered analytics chatbot (Gemini, agentic workflows) inside the reporting dashboard that lets any user generate charts and visualizations through natural-language prompts.
- Built multiple Python REST API automation tools, including one that pulls all 406 branches in parallel with self-healing recovery into a ~730K-row, 100%-accurate master report, cutting a 2–3 day manual process to typically under 2 hours.
- Developing Python-based ETL/ELT pipelines and a centralized PostgreSQL Data Warehouse to integrate multi-source financial data for advanced analytics and automated reporting.
- Built n8n automation workflows that send daily end-of-day microfinance reports to management and alert the team in real time when a system or process goes down, replacing manual daily checks.

Junior Engineer — Product Engineering Team

Jun 2024 – Jul 2025

Progoti Systems Limited (TallyKhata) | Fintech, Dhaka

- Developed Python/SQL automation to resolve routine Money-In/Money-Out transaction disputes, reducing manual investigation efforts.
- Investigated and resolved daily payment disputes using live PostgreSQL/MySQL production databases, collaborating with payment vendors on complex cases.
- Engineered end-to-end ETL pipelines integrating REST APIs and JSON data into PostgreSQL for automated financial reporting.
- Built KPI and fraud-detection dashboards using live production database data, Python, SQL, Looker Studio, and Google Sheets API, improving financial and transaction visibility by 80%.
- Supported Bangla QR payment operations serving 100K+ merchants across NPSB, bKash, Rocket, and 30+ banks.
- Developed real-time monitoring and automated alerting systems (Email/MS Teams) for service health and financial thresholds, reducing downtime by 40%.
- Automated high-volume operational workflows using Python and SQL, reducing manual errors by 40%.

Product Engineer Intern

Mar 2024 – May 2024

Progoti Systems Limited (TallyKhata) | Fintech, Banani, Dhaka

- Supported system monitoring, incident response, and root-cause analysis; automated workflows via Python and API integration; performed API and load testing (Postman, JMeter, Selenium) across live production data pipelines.

Technical Skills

Programming & Backend	Python, SQL, Django, Django ORM, JavaScript, REST APIs, Auth, Middleware, Sessions, Caching
Databases & Warehousing	PostgreSQL, MySQL, BigQuery, Redis, Query Optimization, Indexing, Schema Design
Data Engineering & ETL	ETL/ELT Pipelines, Data Warehousing, Pandas, OpenPyXL, Data Validation, Google Sheets API
AI Integration & Agents	Gemini API, LLM Integration, Agentic Workflows, n8n
Automation & Web Scraping	Python Automation, Multithreading, Selenium, Playwright, BeautifulSoup, Headless Browser Automation
BI & Visualization	Power BI, Metabase, Looker Studio, Chart.js
DevOps & Testing	Docker, Gunicorn, Git, GitHub, Postman, JMeter
Domain Expertise	Fintech, Digital Payments, Microfinance MIS, Fraud Monitoring

Education

B.Sc. in Electrical & Electronic Engineering (EEE) *2020 – 2023*

Bangladesh University, Dhaka | CGPA 3.47

H.S.C. — Rajarbag Police Line College, 2019

S.S.C. — PDB High School, Narshingdi, 2017

Certifications & Training

- Data Science & Machine Learning Using Python — BASIS (BITM), 2024
- The Data Engineer Bootcamp — Udemy
- Multi-Agent AI Systems — Udemy
